

PHILIPS  
G3 AUTODOME® CAMERA  
SYSTEMS

FULL COVERAGE IN ONE  
COMPLETE UNIT.  
EASY TO INSTALL AND OPERATE

Small and powerful, Philips' G3 line of AutoDomes features high zoom and superior low-light performance for day or night operation. They can be used for both indoor and outdoor applications, including lobbies, parking lots, casinos, and retail operations.

*Let's make things better.*

**PHILIPS**

Delivered in one complete unit, these cameras are easy to install and operate.

Philips G3 AutoDome systems are designed to meet the needs of your security application. They easily integrate with our entire security product line, including multiplexers, recorders, and the Allegiant® matrix switchers. Our Unity™ Domes, which have the same appearance as the G3, but contain a preconfigured fixed camera and lens combination, are the perfect complement to the G3 installation. Also available is the new color e-dome™ a camera that lets you view and record everything . . . all the time. Full integration offers you a complete, easy-to-install, low-maintenance CCTV system from a single vendor.

Our customer service program supports your system's operation and features immediate shipment with a three-year warranty. More options, better quality, more support — only from Philips.

## G3 AUTODOME INDOOR

### G3 AutoDome Indoor Systems

Automatic functions and full coverage eliminate the guesswork and simplify operation.

- Complete unit contains one fully integrated system: receiver/driver, camera, pan/tilt mechanism, and dome.
- High-speed pan and tilt finds presets with great accuracy in less than one second.
- 360-degree continuous rotation shows nearly every angle.
- Patented AutoPivot keeps images upright, even when they move directly under the dome.
- Auto-scaling feature ensures optimal viewing.

- High-resolution imager delivers clear pictures for easy identification.
- Auto-playback stores up to fifteen minutes of control commands and plays them back when needed.
- Auto-focus maintains clear images.
- Auto-iris lens automatically adjusts to varying light conditions.
- 18X optical with 12X digital zoom lets you see what is too small to identify in other cameras.
- FastAddress enables you to address the dome remotely — no more ladders.

# G3 BASIC, ENVIRODOME, & DAY/NIGHT AUTODOMES

## G3 Basic AutoDome

This feature rich camera provides high quality, affordable solutions for indoor security applications.

- Redesigned camera offers faster, quieter, and smoother operation than before seen in a dome at this price range.
- Reduced power consumption makes it ideal for high usage situations.
- Same camera easily twists into either the pendant mount or the in-ceiling box.
- On-screen display for programming.
- FastAddress enables you to address the dome remotely — no more ladders.

## G3 EnviroDome™ Outdoor Systems

- Weather-resistant unit stands up to a wide range of temperatures.
- Low profile remains stable in windy conditions.
- Complete, fully integrated unit with advanced features: high-speed pan and tilt, presets, AutoPivot, Auto-playback, FastAddress.
- 360-degree continuous rotation, auto-scaling, and auto-focus ensure optimal viewing.
- 18X optical with 12X digital zoom and high-resolution imager deliver clear images consistently.

## Day/Night AutoDomes

The Philips G3 AutoDomes also offer a Day/Night camera option with lowlight capabilities for both the G3 Indoor and EnviroDome ranges.

- Switch from color to monochrome when light levels drop by removing the IR filter.
- Light level thresholds can be programmed for automatic control, or modes can be manually controlled from the keyboard.
- Ultra high sensitivity is suitable for even the most demanding applications.

G3 AUTODOME/ENVIRODOME SELECTION GUIDE

More options, better quality, more support. Only from Philips.

### **LTC 5136 Series AutoDome Controller**

- Keyboard can control up to 8 AutoDomes or Allegiant receiver/drivers in a daisy chain configuration.
- Complete, user-friendly control of all of the AutoDome system's advanced features.
- Compact unit is ergonomically designed for single-handed control.

### **EnviroDome Fiber Optic Mounts**

Philips integrates fiber optic transceivers with the G3 EnviroDome mounts. These mounts eliminate the need for external boxes and additional hardware at the camera site and give you a clean, efficient method of installing and using fiber optics with the EnviroDome. Available as part of the 120 V EnviroDome kits or as an individual mount, they are easy to order, easy to install, and cost efficient.

**Reliable, Easy to install – Philips has the right G3 AutoDome for your application**

The G3 Indoor, G3 Basic and G3 EnviroDome Series camera systems are designed to save you time. The camera easily twists and locks into place, making installation a breeze. To insure reliability, the G3 AutoDome systems are manufactured with rugged motors and fewer moving parts, making them ideal for high-usage applications.

All the G3 AutoDomes come in a variety of styles, colors, and mounting options for all applications: in-ceiling, wall, pipe, pole (mast), corner, and parapet (roof) mounts. There are also optional dome bubbles in Bronze, Gold and Chrome colors to further customize the units for any decor.

Philips has one of the most complete lines of Dome cameras.
